¹Unduplicated children age 0-5 years and 0-14 years at date of test. Updated 08/15/2012.

²U.S. Census 2010 population counts.

³Children with an elevated blood lead level (capillary, unknown, or venous sample type, 10 mcg/dL or greater).

Counties with fewer than 5 elevated children shown as "< 5" to protect identity of children.

⁴Percentage of children tested with an elevated blood lead level. ~ designates 0 children tested.

⁵Percentage of elevated children with a diagnostic test (elevated venous only). ~ designates 0 children tested.

⁶"Missing" location refers to children for which no residence address was reported. All elevated children have a residential address.
